Subject Index

Acetic acid
Generalized kinetic models for supercritical water oxidation of cutting oil wastes 135
Global reaction heat of acetic acid oxidation in supercritical water 219
Adsorption
Single or two-solute adsorption processes at supercritical conditions: an experimental study 147
Alcoholic beverages
Optimization of countercurrent supercritical fluid extraction conditions for spirits fractionation 41
Antioxidant
Melissa officinalis, L.: study of antioxidant activity in supercritical residues 51
Anti-solvent
Current issues relating to anti-solvent micronisation techniques and their extension to industrial scales 159
2,2′-azobis(isobutyronitrile)
Co-solvent and pressure effect on the thermal decomposition of 2,2′ azobis(isobutyronitrile) in supercritical CO_2 using UV–Vis spectroscopy 227

Binary mixture
Vapor–liquid equilibria of carbon dioxide with ethyl benzoate, diethyl succinate and isoamyl acetate binary mixtures at elevated pressures 111
Blue 79
Solubilities of disperse dyes of blue 79, red 153, and yellow 119 in supercritical carbon dioxide 1
Brandy
Optimization of countercurrent supercritical fluid extraction conditions for spirits fractionation 41

Carbon dioxide
Disruption of glandular trichomes with compressed CO_2: alternative matrix pre-treatment for CO_2 extraction of essential oils 11
Single or two-solute adsorption processes at supercritical conditions: an experimental study 147
Carbon monoxide
Generalized kinetic models for supercritical water oxidation of cutting oil wastes 135
β-Carotene
Solubility of β-carotene in supercritical CO_2 and the effect of entrainers 195
Catalysis
Partial oxidation of propane in sub- and supercritical water 233
Chamonilla recutita [L.] Rauschert
Supercritical CO_2 extraction of essential oil and oleoresin from chamomile (*Chamomilla recutita* [L.] Rauschert) 245
CO_2 extraction
Supercritical CO_2 extraction of essential oil and oleoresin from chamomile (*Chamomilla recutita* [L.] Rauschert) 245
Controlled release system
Controlled release system formed by supercritical antisolvent coprecipitation of a herbicide and a biodegradable polymer 61
Co-solvent
Co-solvent and pressure effect on the thermal decomposition of 2,2′ azobis(isobutyronitrile) in supercritical CO_2 using UV–Vis spectroscopy 227
Countercurrent SFE
Optimization of countercurrent supercritical fluid extraction conditions for spirits fractionation 41
Cuticular waxes
Extraction of lemongrass essential oil with dense carbon dioxide 33
Cutting oils
Generalized kinetic models for supercritical water oxidation of cutting oil wastes 135

Data
Vapor–liquid equilibria of carbon dioxide with ethyl benzoate, diethyl succinate and isoamyl acetate binary mixtures at elevated pressures 111
Dense carbon dioxide
Extraction of lemongrass essential oil with dense carbon dioxide 33
Dispersion
Analysis of the supersaturation and precipitation process with supercritical CO_2 257
Dispersion dyestuffs
Solubilities of disperse dyes of blue 79, red 153, and yellow 119 in supercritical carbon dioxide 1

Equations of sate
Measurement of phase equilibria of supercritical ethane and paraffins 181
Equations of state
Modeling of solid–supercritical fluid phase equilibria with a cubic equation of state—G^{ex} model 123
Essential oils
Disruption of glandular trichomes with compressed CO_2:

0896-8446/01/$ - see front matter © 2001 Elsevier Science B.V. All rights reserved.
PII: S0896-8446(01)00128-0

alternative matrix pre-treatment for CO_2 extraction of essential oils 11
Ethane
Measurement of phase equilibria of supercritical ethane and paraffins 181
Experimental design
Optimization of countercurrent supercritical fluid extraction conditions for spirits fractionation 41
Experimental method
Single or two-solute adsorption processes at supercritical conditions: an experimental study 147
Experiments
Solubility of β-carotene in supercritical CO_2 and the effect of entrainers 195
Extraction
Disruption of glandular trichomes with compressed CO_2: alternative matrix pre-treatment for CO_2 extraction of essential oils 11

Fixed bed extractor
Supercritical CO_2 extraction of essential oil and oleoresin from chamomile (*Chamomilla recutita* [L.] Rauschert) 245

GAS
Current issues relating to anti-solvent micronisation techniques and their extension to industrial scales 159
G^{ex} model
Modeling of solid–supercritical fluid phase equilibria with a cubic equation of state—G^{ex} model 123
Glandular trichomes
Disruption of glandular trichomes with compressed CO_2: alternative matrix pre-treatment for CO_2 extraction of essential oils 11
Global reaction heat
Global reaction heat of acetic acid oxidation in supercritical water 219

Herbicide
Controlled release system formed by supercritical antisolvent coprecipitation of a herbicide and a biodegradable polymer 61
High pressure
Phase behavior of isotactic polypropylene/C4-solvents at high pressure. Experimental data and SAFT modeling 93
Hydrothermal oxidation
Global reaction heat of acetic acid oxidation in supercritical water 219

Impregnation
Single or two-solute adsorption processes at supercritical conditions: an experimental study 147
Inorganic compound
Development of a solution model to correlate solubilities of inorganic compounds in water vapor under high temperatures and pressures 105

Kinetic models
Generalized kinetic models for supercritical water oxidation of cutting oil wastes 135

Lanolin
Near-critical solvent extraction of wool with modified carbon dioxide — experimental results 23
Lemon balm
Melissa officinalis, L.: study of antioxidant activity in supercritical residues 51
Lemongrass essential oil
Extraction of lemongrass essential oil with dense carbon dioxide 33

Matrix pre-treatment
Disruption of glandular trichomes with compressed CO_2: alternative matrix pre-treatment for CO_2 extraction of essential oils 11
Membrane
Regeneration of supercritical carbon dioxide by membrane at near critical conditions 81
Metal ion incorporation reaction
Development of stopped-flow instrument with spectrophotometric detection for the study of fast reactions in supercritical carbon dioxide; kinetics of metalloporphyrin formation in supercritical carbon dioxide 205
Newly devised spectrophotometric cell for measurements of solubility and slow reaction rate in supercritical carbon dioxide 71
Micronisation
Current issues relating to anti-solvent micronisation techniques and their extension to industrial scales 159
Mixing
Analysis of the supersaturation and precipitation process with supercritical CO_2 257
Modelling
Solubility of β-carotene in supercritical CO_2 and the effect of entrainers 195
Modified supercritical CO_2
Near-critical solvent extraction of wool with modified carbon dioxide — experimental results 23

n-Alkanes
Measurement of phase equilibria of supercritical ethane and paraffins 181

Oily waste
Generalized kinetic models for supercritical water oxidation of cutting oil wastes 135
Oxygenate synthesis
Partial oxidation of propane in sub- and supercritical water 233

Partial oxidation
Partial oxidation of propane in sub- and supercritical water 233

Particle formation
Analysis of the supersaturation and precipitation process with supercritical CO_2 257
Permeation
Regeneration of supercritical carbon dioxide by membrane at near critical conditions 81
Pharmaceuticals
Analysis of the supersaturation and precipitation process with supercritical CO_2 257
Phase equilibria
Measurement of phase equilibria of supercritical ethane and paraffins 181
Phase behavior of isotactic polypropylene/C4-solvents at high pressure. Experimental data and SAFT modeling 93
Polyphenol
Melissa officinalis, L.: study of antioxidant activity in supercritical residues 51
Polypropylene
Phase behavior of isotactic polypropylene/C4-solvents at high pressure. Experimental data and SAFT modeling 93
Porphyrin
Development of stopped-flow instrument with spectrophotometric detection for the study of fast reactions in supercritical carbon dioxide; kinetics of metalloporphyrin formation in supercritical carbon dioxide 205
Newly devised spectrophotometric cell for measurements of solubility and slow reaction rate in supercritical carbon dioxide 71
Precipitation
Controlled release system formed by supercritical antisolvent coprecipitation of a herbicide and a biodegradable polymer 61
Current issues relating to anti-solvent micronisation techniques and their extension to industrial scales 159
Pressure effect
Co-solvent and pressure effect on the thermal decomposition of 2,2′ azobis(isobutyronitrile) in supercritical CO_2 using UV–Vis spectroscopy 227
Propane
Partial oxidation of propane in sub- and supercritical water 233

Rancimat
Melissa officinalis, L.: study of antioxidant activity in supercritical residues 51
Rapid mixing technique
Development of stopped-flow instrument with spectrophotometric detection for the study of fast reactions in supercritical carbon dioxide; kinetics of metalloporphyrin formation in supercritical carbon dioxide 205
Reactor simulation
Global reaction heat of acetic acid oxidation in supercritical water 219
Red 153
Solubilities of disperse dyes of blue 79, red 153, and yellow 119 in supercritical carbon dioxide 1
Regeneration
Regeneration of supercritical carbon dioxide by membrane at near critical conditions 81
Regular solution theory
Development of a solution model to correlate solubilities of inorganic compounds in water vapor under high temperatures and pressures 105
Rejection
Regeneration of supercritical carbon dioxide by membrane at near critical conditions 81

SAFT-EOS
Phase behavior of isotactic polypropylene/C4-solvents at high pressure. Experimental data and SAFT modeling 93
Salt
Development of a solution model to correlate solubilities of inorganic compounds in water vapor under high temperatures and pressures 105
Scale-up
Current issues relating to anti-solvent micronisation techniques and their extension to industrial scales 159
Solid–supercritical fluid phase equilibria
Modeling of solid–supercritical fluid phase equilibria with a cubic equation of state—G^{ex} model 123
Solubility
Analysis of the supersaturation and precipitation process with supercritical CO_2 257
Development of a solution model to correlate solubilities of inorganic compounds in water vapor under high temperatures and pressures 105
Newly devised spectrophotometric cell for measurements of solubility and slow reaction rate in supercritical carbon dioxide 71
Solubility of β-carotene in supercritical CO_2 and the effect of entrainers 195
Spectrophotometric cell
Newly devised spectrophotometric cell for measurements of solubility and slow reaction rate in supercritical carbon dioxide 71
Stopped-flow instrument
Development of stopped-flow instrument with spectrophotometric detection for the study of fast reactions in supercritical carbon dioxide; kinetics of metalloporphyrin formation in supercritical carbon dioxide 205
Supercitical extraction
Near-critical solvent extraction of wool with modified carbon dioxide — experimental results 23
Supercritical
Measurement of phase equilibria of supercritical ethane and paraffins 181
Single or two-solute adsorption processes at supercritical conditions: an experimental study 147

Supercritical anti-solvent
Controlled release system formed by supercritical anti-solvent coprecipitation of a herbicide and a biodegradable polymer 61
Supercritical carbon dioxide
Solubilities of disperse dyes of blue 79, red 153, and yellow 119 in supercritical carbon dioxide 1
Solubility of β-carotene in supercritical CO_2 and the effect of entrainers 195
Supercritical CO_2
Co-solvent and pressure effect on the thermal decomposition of 2,2′ azobis(isobutyronitrile) in supercritical CO_2 using UV–Vis spectroscopy 227
Development of stopped-flow instrument with spectrophotometric detection for the study of fast reactions in supercritical carbon dioxide; kinetics of metalloporphyrin formation in supercritical carbon dioxide 205
Newly devised spectrophotometric cell for measurements of solubility and slow reaction rate in supercritical carbon dioxide 71
Supercritical extraction
Extraction of lemongrass essential oil with dense carbon dioxide 33
Melissa officinalis, L.: study of antioxidant activity in supercritical residues 51
Supercritical fluid
Regeneration of supercritical carbon dioxide by membrane at near critical conditions 81
Supercritical water
Partial oxidation of propane in sub- and supercritical water 233
Supercritical water oxidation
Generalized kinetic models for supercritical water oxidation of cutting oil wastes 135

Temperature profile
Global reaction heat of acetic acid oxidation in supercritical water 219
Thermal decomposition
Co-solvent and pressure effect on the thermal decomposition of 2,2′ azobis(isobutyronitrile) in supercritical CO_2 using UV–Vis spectroscopy 227

Vapor–liquid equilibria
Vapor–liquid equilibria of carbon dioxide with ethyl benzoate, diethyl succinate and isoamyl acetate binary mixtures at elevated pressures 111
Vapor–Liquid–Liquid
Phase behavior of isotactic polypropylene/C4-solvents at high pressure. Experimental data and SAFT modeling 93
View cell
Measurement of phase equilibria of supercritical ethane and paraffins 181

Water
Development of a solution model to correlate solubilities of inorganic compounds in water vapor under high temperatures and pressures 105
Wool wax
Near-critical solvent extraction of wool with modified carbon dioxide — experimental results 23

Yellow 119
Solubilities of disperse dyes of blue 79, red 153, and yellow 119 in supercritical carbon dioxide 1
